KEEP IT SIMPLE SYSTEMS

INFORMATION TECHNOLOGY

*Powerful Multi User Accounting and Business Management Software.*

MYOB has really come of age and is now suitable for larger enterprises. Features payroll, inventory, time billing and multiple currencies.

## MYOB – Who knows what it can do?

Most people know that their VCR is capable of more than they demand of it; it's just that they never seem to come to terms with its full functionality.

So, you can imagine, when you take a complex and fully comprehensive accounting software package like MYOB, is it any wonder that most businesses barely scratch the surface of its full capabilities.

We also find that most software packages of this calibre normally can still only cover the basics in their documentation.

That's where we come in. Kiss IT know MYOB inside out. We can show you how to adapt MYOB to real life, rather than adapt real life to the way MYOB works as a "standard" package.

## Our process is simple.

1. We work with the key person in charge of accounting
2. We plan the overall structure of the accounts to best suit the business
3. We discuss preferred accounting outcomes or goals
4. We gather details from all input areas of the business
5. We review management reporting requirements
6. We design overall presentation such as invoices, orders, statements etc.
7. We also review your computing environment, how many users etc
8. We then install MYOB fully configured to best suit your approved specs
9. We train your staff as required, immediately and/or over time
10. We fully support the installation with telephone and on-site services
11. We even provide trained staff to assist with any overload or ongoing regular work.

## KISS IT ACCOUNTS

**KISS IT ACCOUNTS**

**Inventory Control through MYOB is a specialty.**

We have a team of several MYOB Certified Consultants and it is our aim to see our clients make the most of their MYOB software. Kiss IT has many years of invaluable practical experience over a broad range of industries which means your MYOB is up and running, fast, with no fuss.

In our experience, the key to a good accounts system is only partly the software. As good as MYOB is, unless it is setup and then operated properly, it will under perform its designed functionality.

Many users? Large file? Ask us about MYOB running via Terminal Services for dramatic speed and stability improvements.

What's more, with our computer hardware and networks division we are able to offer a comprehensive service that can revitalize your computing environment with affordable, state-of-the-art systems and services.

These Services Include

- > *Network design – Local Area Networks (LAN) and Wide Area Networks (WAN)*
- > *Computer hardware and peripherals– Supply and service*
- > *Shared internet access – ADSL*
- > *Dial Up*
- > *Firewall protection – Complete network security*
- > *Antivirus Strategies – Regularly updated*
- > *Remote access – work from home or anywhere.*
- > *Groupware – Shared Calendars, contacts, faxes and email folders*

**Get ahead of your finances today with MYOB and Kiss IT.**
